

ND-ES Lab Electrospinning

Lab electrospinning unit

Nadetch ND-ES Lab Electrospinning Unit is a completely automatized equipment for fiber fabrication via electrospinning technique. Its design and programmable software allows to control and automatize every electrospinning parameter with high accuracy and reproducibility. ND-ES Lab Electrospinning Unit is used to obtain nanometric fibers for multiple applications such as biomedical coatings and all kind of smart coatings.

Technical specifications

High voltage supply
Electrode distance
Collector dimensions
Needle
Syringe maximum volume
Flow rate
Dimensions (L·W·H)

ND-ES Standard Unit

0-30 kV
50-200 mm
200x200 mm
Kit with multiple needle gauges
50 mL
0.005 ml/h – 1000 ml/h
530x700x740

ND-ES Lab Electrospinning Unit has been designed for the production and deposition of nanofibers on different substrates. ND-ES Lab Electrospinning Unit consists on an emitter connected to a controllable high voltage source. The system allows an accurate control of the flow rate, voltage and distance between the emitter and the collector. The equipment is manufactured for both vertical and horizontal depositions, allowing simple layout changes. Rotatory and planar disc collectors are available to obtain specific electrospinning fiber patterns.

The user friendly Windows® based software permits to control all the electrospinning process parameters with high accuracy. The user has a full automatized control of the voltage, flow rate, needle distance and collector parameters. Nadetch®'s software also allows store all these settings for further usage, which guarantees a high reproducibility of the coatings.

Software requirements

Operative system

Windows XP; Windows Vista; Windows 7; Windows 8; Windows 10

Processor

Pentium 400 MHz or equivalent (Minimum) | Pentium 1 GHz or equivalent

RAM

96 MB (Minimum) | 256 MB (Recommended)

Hard Disk

The installation requires 500 MB of free disk space

Monitor

800x600, 256 colors (Minimum) | 1024x768 high color, 32-bit (Recommended)

Dimensions

Accessories

ND-ES Collectors

Planar, rotating drum and disc collectors

ND-ES Spinnerets

Single, coaxial, triaxial and multi-nozzle spinnerets.
Automated linear movement

ND-ES Taylor Cone Camera

Digital camera module. Process registering and performance feedback

Dual voltage

Dual voltage
+30kV / -30kV

ND-ES Humidity & Temperature sensor

Precision humidity and temperature sensor
Dust and dirt protected
0-100% RH / -40 to 60°C

ND-ES Touchscreen

7" Touchscreen
Intuitive software
